

Moaz Raheem

React JS Developer / Front End Designer at Innvoytech

 Faisalabad, Pakistan  moazraheem391@gmail.com  03019739945

Profile

Creative UI Designer and Frontend React.js Developer with a strong focus on building responsive, user-friendly web applications. Highly skilled in React.js, Bootstrap, Tailwind CSS, and Sass for crafting modern, visually appealing user interfaces. While my experience leans heavily towards frontend development, I also have foundational knowledge of backend technologies, particularly within the MERN stack. Passionate about delivering high-quality, scalable designs and eager to contribute to innovative projects.

Skills & Strengths

- Portfolios
- Responsive Designs
- Problem Solving
- Android Development
- Web Development
- Reactjs
- Mern Stack Developer

Education

Government College University Faisalabad - Faisalabad | Software Engineering, 2024 | 3.0 GPA

DPS College - Faisalabad | Fsc Pre-Engineering, 2024 | 75%

Royal Grammar School - Faisalabad | Matric, 2024 | 84%

Experience (less than 1 year)

Ui Designer /Frontend React Js Dev

December 2024 - January 2025

Genius Mind Zone - Faisalabad, Pakistan

At GMZ, I contributed to the Social Downloader project (<https://dashbone.social/>) by designing the YouTube section, which includes profile views, a video short downloader, and ensuring overall website responsiveness. I also worked on Complya, an AI-powered compliance platform (<https://complya.com/>), currently under development, where I designed various screens, including model screens, and implemented responsive layouts to improve the overall user experience.

Instructor

September 2024 - November 2024

Innvoytech - Faisalabad, Pakistan | Sep 2024 - Nov 2024

As a dedicated instructor at InnvoyTech, teach different forms of web development to the trainee developers to become comfortable and confident with web-related skills. My areas of interest in teaching is Mern Stack Development, along with creating hands-on projects directly related to real-world applications.

Frontend Developer

July 2023 - January 2024

Pak Freelancer Software House - Faisalabad, Pakistan | Jul 2023 - Jan 2024

At Pak Freelancer Software House, Wapda City, FSD, I spent 6 months developing responsive and user-friendly web applications using HTML5, CSS3, and JavaScript. By applying responsive design principles, I ensured consistent user experiences across various devices

Projects

Inko-Moko UI Template

<https://inko-moko-ui-template.netlify.app/>

Tools: Reactjs, Sass, Bootstrap

The **Inko-Moko Dashboard UI Template** is a modern, responsive dashboard built with **Reactjs**. It features a sleek, intuitive layout, customizable components, and interactive elements like dynamic charts. Designed with a mobile-first approach.

Textutils-text-analyzer-app

<https://textutils-text-analyzer-app.netlify.app/>

Tools: Reactjs

The **TextUtils Text Analyzer App** is a web application built in ReactJs, designed to analyze and manipulate text efficiently. It includes features like word and character counting, text transformation (uppercase/lowercase), and whitespace removal

Plixi -modern UI Template

<https://plixi-template.netlify.app/>

Tools: Reactjs, Sass, Bootstrap

The **Plixi Website Clone** is a fully responsive replica of the original Plixi website, developed using **HTML, CSS, and JavaScript**. It accurately mirrors the design, layout, and interactive elements of the original site, showcasing expertise in front-end development and attention to detail. The clone is optimized for cross-device compatibility and smooth user experience.

NewsTime-NewsApp

<http://localhost:3000/>

Tools: ReactJs, Bootstrap

Developed a news aggregator web app using React.js with features like infinite scroll, category-based navigation, and dynamic article loading from NewsAPI. Implemented skeleton loaders for data fetching and error handling for seamless user experience. Utilized React Router for efficient routing and ensured mobile-first responsiveness with Bootstrap.
